ALL-IN-ONE ADSL2+ MODEM ROUTER

HIGH-SPEED INTERNET
The ALL-IN-ONE ADSL2+ Modem Router is a versatile, high-performance remote router for home and the small office. With integrated ADSL2/2+ supporting up to 24Mbps download speed, firewall protection, Quality of Service (QoS), draft 802.11n wireless LAN and 4 Ethernet switch ports, this router provides all the functions that a home or small office needs to establish a secure and high-speed remote link to the outside world.

ULTIMATE WIRELESS CONNECTION
The ALL-IN-ONE ADSL2+ Modem Router provides wireless speeds that are many times faster than 802.11g. Maximize wireless performance and stay connected from virtually anywhere at home and in the office. The DSL-2740B supports WPA/WPA2 and WEP data encryption methods for flexible user access security.

FIREWALL PROTECTION & QoS
Security features prevent unauthorized access to the home and office network from wireless devices or from the Internet. The ALL-IN-ONE ADSL2+ Modem Router provides firewall security, such as Stateful Packet Inspection (SPI) and hacker attack logging. SPI inspects the contents of incoming packets before they are allowed in, while hacker logging helps to protect your network against Denial of Service (DoS) attacks. For Quality of Service (QoS), the router supports priority queues to enable a group of home or office users to experience the benefit of a smooth network connection without concern of traffic congestion.

COMPATIBILITY ASSURANCE
The ALL-IN-ONE ADSL2+ Modem Router is backward compatible with existing 802.11b and 802.11g wireless equipment, ensuring compatibility with a wide range of wireless devices. In addition, this router includes four Ethernet ports ready for you to connect Ethernet-enabled PCs, print servers and other devices.
