

Step 1: Go to Safari -> Preference -> Security, **Enable plug-ins/Enable Java/Enable JavaScript**

Step 2: Go to Java's website: <http://www.java.com/en/download/testjava.jsp> and follow up the steps.

The screenshot shows the Java website's help resources page. The header is red with the Java logo and navigation links for 'Download' and 'Help'. A search bar is located in the top right corner. The main content area is titled 'How do I test whether Java is working on my computer?'. On the left, there is a 'HELP RESOURCES' sidebar with links to 'Installing Java', 'Disable Java', 'Troubleshoot Java', 'Using Java', 'General Questions', and 'Security'. The main content area displays a confirmation message: 'Your Java is working' with a green checkmark icon and 'Latest Java installed'. Below this, it states 'Your Java configuration is as follows:' and lists the following details: Vendor: [Oracle Corporation](#), Version: [Java SE 7 Update 21](#), Operating System: [Mac OS X 10.8.3](#), and Java Architecture: [64-bit](#).

Step 3. Close the browser and restart the browser.

The screenshot shows the mydlink website's login page. The header is blue with the mydlink logo and navigation links for 'FAQ | Support | Language: English'. The main content area features a background image of a modern living room. On the right, there is a 'Sign in to mydlink' section with a text input field for the email address, a password input field with masked characters, and a 'Remember me' checkbox. A 'Sign in' button with a right-pointing arrow is located below the input fields. At the bottom right, there are links for 'Forgot your password?' and 'Not Registered?'. The footer is blue.
