

1

Connecting the Antenna

The ANT24-0600 attaches to the RP-SMA connector that is standard on most D-Link® products. Simply disconnect your existing antenna and connect the cable from the ANT24-0600 to the RP-SMA connector on your D-Link® product.

The ANT24-0600 also includes an RP-SMA to RP-TNC adapter for attaching the ANT24-0600 to products with a RP-TNC connector.

2

Installing the ANT24-0600

A. Simply remove the default antenna from device such as AP or Router and replace it with ANT24-0600.

B. Identify an optimal location for the antenna. The antenna can be placed on a flat surface such as desk, mounted on the wall or use magnetic mounting method to places such as partition.

Note : Allow the cable to bend naturally. It's recommended that you place the antenna near wireless devices to avoid excessive strain on the cable and connector.

C. Adjust the angle of the antenna to a right angle, which can attain better signal transmission and a larger coverage area.

3

Mounting the Antenna (optional)

A. Wall Mounting :

Step 1 : Identify a mounting location and place the sticker on.
 Step 2 : Use a 4/16" drill bit to drill holes at 2 marked places on sticker.
 Step 3 : Tap the plastic anchors gently into the hole by using a rubber mallet or hammer.

Step 4 : Use a screwdriver to secure the screws into the plastic anchors.
 Be sure to leave enough space so the antenna base will slide over the head of the screw.

Step 5 : Place the antenna base over the screw and slide it into the locking position.

B. Magnetic Mounting :

Step 1 : Identify a mounting location which is available for magnetic using. For example : Office partition, white board, etc.
 Be sure not to place antenna onto monitor, hard disk, notebook, etc.
