AirPlus Xtreme G[™] 802.11g/2.4GHz Wireless **108Mbps PCI Adapter**

D-Link, the industry pioneer in wireless networking, introduces another performance breakthrough in wireless connectivity—the *D-Link AirPlus Xtreme G*[™] series of high-speed devices.

The D-Link *AirPlus Xtreme G* DWL-G520 PCI Adapter is a wireless PCI adapter featuring the very latest in advanced wireless silicon chip technology to deliver incredibly fast data transfer in the 2.4GHz frequency. The DWL-G520 also works with 802.11b standard wireless devices and, when used with other D-Link *AirPlus Xtreme G* products, delivers throughput speeds capable of handling heavy data payloads.

With the enhancement of D-Link 108G, the DWL-G520 can achieve wireless speeds up to 15x faster than standard 802.11b in a pure D-Link 108G environment through the use of new wireless techniques such as Packet Bursting, FastFrame, Compression & Encryption, and Turbo mode.

This provides a bandwidth large enough to handle video/audio streaming and Video on Demand (VoD) applications.

The D-Link *AirPlus Xtreme G* DWL-G520 also includes a configuration utility to discover available wireless networks and create and save detailed connectivity profiles for those networks most often accessed.

The DWL-G520 is a powerful 32-bit PCI adapter that installs quickly and easily into desktop PCs, and when used with other D-Link *AirPlus Xtreme G* products, automatically connects to the network. Like all D-Link wireless adapters, the DWL-G520 can be used in ad-hoc mode to connect directly with other 2.4GHz wireless computers for peer-to-peer file sharing or in infrastructure mode to connect with a wireless access point or router for access to the Internet in your office or home network.
