Contents of Package:

- DWL-520 11Mbps Wireless PCI Adapter
- Printed Quick Installation Guide
- CD with Manual and Drivers

If any of the above items are missing, please contact your reseller.

1. Installing the DWL-520

Before you start, make sure to turn off your computer and unplug the power cord.

Note: To avoid damage caused by static electricity, make sure to properly ground yourself by first touching a metal part of your computer to discharge any static electricity before working with the DWL-520 Wireless PCI Adapter.

- **Remove** the back cover of the computer.
- **Install** the DWL-520 carefully and firmly into an available PCI slot which is usually “white” or “cream” colored
- **Secure** the DWL-520 with a screw.
- **Replace** the computer’s cover.
• Plug in the power cord and turn on your computer.
• Insert the DWL-520 driver CD into the CD-ROM drive.

The following “Welcome” screen will appear. Select “Install from a list or specific location.”

NOTE: If this screen does not appear, go to Start > Settings > Control Panel > Add Hardware. Double-click on the icon.

• Click Next

• Select “Search for the best drivers in these locations.”

• Browse for the drivers on the driver CD i.e. D:\DWL-520 where D: refers to the CD-ROM drive.

• Click Next
• Click on “Continue Anyway.”

(D-Link software is currently undergoing Windows Logo testing. Microsoft certification is pending.)

Windows will load the necessary files.

• Click “Finish” to complete the installation.
To connect to your wireless network, please do the following:

- **Double-click** on the **icon** in the task bar.

  ![Connect to Wireless Network](image1)

  The “Connect to Wireless Network” window will contain a list of all the available Wireless Networks. Select the proper network for your needs. In this example, “default” network was selected as shown.

- **Click “Connect.”**

  ![Wireless Network Connection](image2)

  This notice is displayed to confirm the wireless connection.

- **Double-click** on the icon in the task bar to see status and information about your connected network. The window on the next page will appear.
The window below will appear showing the current status of your connected network.
You can find the most recent software and user documentation on the D-Link website.
